Pallinup River 2001-2017 Photo Audit Comparison

The initial reconnaissance was undertaken by Steve Janicke and Travis Drysdale. The information was used to make an assessment about the general ecological condition of the river and what management issues were relevant. The photo audit provided a rapid assessment that could be repeated at a later date to track changes in the river condition. Several sites were revisited after a moderate flood that same year and this confirmed that the photo points could provide a valid measure of environmental change.
